“Hard work beats talent when talent doesn't work hard.” - *Tim Notke*

# About **Me**

Hello! My name is Alvian Tedy Aditya. I am a fresh man of Computer Engineering from Politeknik Elektronika Negeri Surabaya with a GPA of 3,61.

I always been someone who has both creative and logical side. So, Front End Development and UI/UX would be perfectly fit for me.

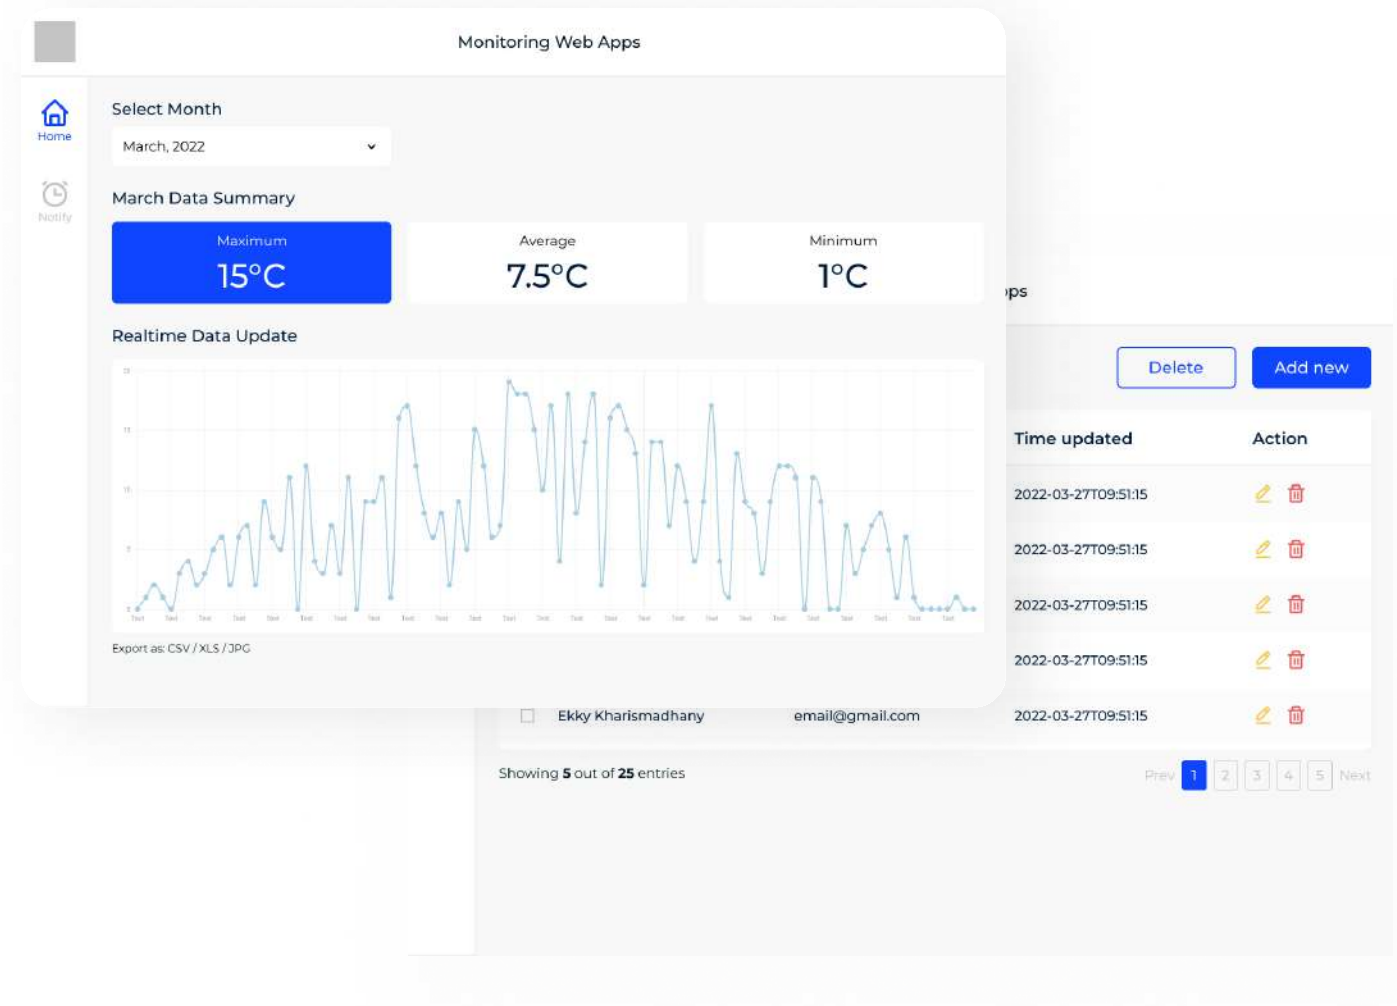

My main focus these days is building accessible, inclusive products, digital experiences, and always craving for more in the fields of Front End Development and UI/UX Design. I also capable with Javascript workflow, designing clean UI, and converting beautiful UI Design to useful application for the users.

I believe that passion, hard work, curiosity, and empathy will lead me to achieve my goals.

# ***Front End Portfolio***

# Vaccine Box:

## Vaccine Monitoring System

### Description:

Vaccine box is website that developed to monitoring the case/box of vaccine in hospitals.

This project can display temperature conditions and report messages that are connected to the Telegram bot in real time. Temperature data is displayed in the form of a chart.

### Tech Stack:
